

Yeabsira Tarekegn

Software Engineer

I'm a software developer based in Addis Ababa specializing in the MERN Stack and Next.js. Balancing academic pursuits with hands-on development work. My journey has been one of continuous learning, where each line of code written is a step towards mastering the craft. I'm seeking opportunities that allow me to further hone my skills, tackle real-world challenges, and grow within collaborative environments.

WORK EXPERIENCE

Full Stack Developer

Nileode Technology

01/2025 - Present

Achievements/Tasks

- Currently working as a Full-Stack Developer at [Nileode Technologies](#), where I collaborate with cross-functional teams to design, develop, and maintain modern web applications. I contribute across the entire stack, from building responsive user interfaces to implementing scalable backend solutions, ensuring performance, accessibility, and clean code standards.

Front End Lead

Go2Cod

11/2024 - 01/2025

Achievements/Tasks

- As the Frontend Lead at Go2Cod, I was responsible for designing and developing [Calmify](#), an AI-powered therapy platform aimed at enhancing mental health support. The project won first place in a competition spanning all of Africa, showcasing innovation in AI-driven wellness solutions.

PERSONAL PROJECTS

Breadit 

- Breadit is a full-stack website built using modern web technologies, including Next.js with the App Router, TypeScript, and Tailwind CSS. The project provides a smooth, dynamic user experience with features like infinite scrolling for loading posts, authentication via NextAuth

Cypress 

- This project is a simplified clone of the popular productivity application, Notion. It's designed to replicate some of the core features of Notion, providing a platform where users can create, edit, and organize their notes in a flexible and intuitive interface.

Ethiopian Elegance 

- E-commerce website designed to sell traditional Ethiopian clothing, jewelry, and home goods. The platform allows users to browse products by category, view detailed descriptions, and add items to a shopping cart. It includes essential e-commerce functionalities such as user account creation, order history tracking, and checkout with payment integration using Stripe.
